High Pressure Line
Incorporated to allow for high pressure contrast media infusions at 300psi with a flow of 10ml/sec.

Colour Coded Lumens
Clearer identification of the lumen reduces the potential risk of mis-connections.

LuerSafe® Connectors
Needle-free and integrated into the catheter to reduce the risk of infection and air embolism.

Colour Coded Lumens
Reduces the risk of maladministration due to mis-identification of the lines.

Multi-Tube™ Technology
Unique catheter design allows for multiple lumens without any compromise to flow or catheter size.

LuerSafe® Connectors
Reduces the risk of infection and air embolism.

Multi-Tube™ Technology
For superior flow rates and no French size compromise.

ProActiv+™ Advanced PHMB Polyhexanide Antimicrobial Bonding
- Broad spectrum of activity
- Biocompatible
- Non-eluting covalent bonding

Protecting the patient for the life of the catheter.*
- Safe to use in all your patients
- Effective against positive gram, negative gram and fungi
* for up to 30 days

High Pressure Line
Reduces secondary interventions.
