Cricothyrotomy Sets Quicktrach
Cricothyrotomy is an emergency procedure to avoid death from suffocation in case of upper airway obstruction if intubation or tracheotomy are impossible. VBM offers two Quicktrach-Sets with the following advantages:

- Fast and safe airway in case of upper airway obstruction
- Sterile sets are pre-assembled and immediately ready for use
- Specially grinded needle tip makes prior incision via scalpel unnecessary and reduces the risk of bleeding
- Stopper prevents needle from being inserted too deep to reduce the risk of posterior tracheal wall perforation
- Necktape allows a fast and safe fixation
- Quickest airway access via one-step procedure

**Quicktrach I**
complete set, sterile packed

</tr>
</tbody>
</table>

**Quicktrach II with Cuff**
- thin cuff seals the trachea and allows efficient ventilation with aspiration protection
- stopper and safety clip reduce the risk of posterior tracheal wall injury
- anatomically shaped cannula adjusts to the trachea due to „memory effect“

complete set, sterile packed

**Cricothyrotomy Trainer**
complete with exchangeable skin and thyroid cartilage
REF 30-15-000

**Crico-Trainer**
offers the possibility to train Cricothyrotomy and percutaneous tracheostomy.
complete with 10 skins and 10 tracheas
REF 30-14-000
