

# Innovation doesn't stop with HD catheters

Patients are individuals, they come in all shapes and sizes. The new Kflow Epic peritoneal catheter range addresses the needs of the individual, offering to the market for the first time a range of PD catheters that are available in a variety of fr sizes and lengths to best suit the individual.

Utilising leading edge materials the soft biocompatible polyurethane provides excellent tensile strength, while allowing for a thinner lumen wall and larger internal lumen diameter compared to standard silicone catheters, facilitating rapid dialysate flows without leaks.

## ACCESSORIES

Code	Description	Box Qty
 KFE-COV	Kflow Epic connector valve pack contain x2 valves this part is to be connected to a functioning valve but can be changed every dialysis session if required.	5
 KFE-REV	Kflow Epic repair valve pack contains 1 valve this part is to be connected to a defective valve	5
 Unifix	Adhesive sutureless securement device for catheter fixation and anchoring	50
 KFE-RPK-AV	Repair extension assembly each box contains x3 A (red) & x3 V (blue) extension assemblies	6
 KFCVCS	CVC insertion pack standard suitable for temporary catheter insertion	24
 KFCVCP	CVC insertion pack premier suitable for temporary catheter insertion.	16
 KFCVC1	CVC insertion pack suitable for tunnelled catheter insertion.	7
 KFPDP1	PD catheter insertion pack suitable for medical or surgical insertion	5
 KFAVF1	Arterial Venous Fistula on / off pack	40
 KFCHD1	Dialysis catheter on / off pack	30

# Short Term Catheters

A new solution to old problems

**NEWMULTI-TUBE™**  
TECHNOLOGY

Whatever your short term dialysis catheter needs we have it covered.

Kflow Epic short term catheters boast one of the most extensive ranges offered to the market, with fr sizes and lengths ranging from 6fr -14fr.

All catheters are supplied in kit format incorporating superior product materials and technologies to facilitate easy catheter placement.

- The fusion of 2 Round lumens facilitate laminar flow.
- Excellent flow rates of 400mls/min at venous pressures less than 230mmHg.
- Soft tip featuring intelligent grooves which protect the side holes from sucking against the vessel wall.
- Innovative new design means improved patient comfort - no need for traditional hub.
- Incorporation of haemostatic valves ensures a safe closed system negating the need for traditional thumb clamps.
- Catheter fixation achieved without suturing.
- The soft biocompatible polyurethane material can be shaped to fit any approach.
- Reduced stocking - 2 fr sizes, one length fits all patients.
- Easy order codes.

# Long Term Catheters

Kflow Epic tunnelled catheter ranges, facilitating the access needs and requirements of clinicians and patients.

Kflow Epic Split Tip, available in 12 – 16fr straight or pre-curved catheter format.

Kflow Epic Stepped Tip, available in 12 – 16fr straight or pre-curved catheter format.

Kflow Epic Twin catheter 2 x 10fr single lumen catheters.

Kflow Epic Retro Stepped, available 8 -16fr in a straight or pre-curved catheter format.

Kflow Epic Retro Split, available in 8 – 16fr in a straight or pre curved catheter format.
