KFE-HDL-1631-PCK	16	31	36	Long term haemo stepped tip dual lumen pre curved catheter kit	2.25	2.50	10
KFE-HDL-1635-PCK	16	35	40	Long term haemo stepped tip dual lumen pre curved catheter kit	2.50	2.70	10
KFE-HDL-1650-PCK	16	50	55	Long term haemo stepped tip dual lumen pre curved catheter kit	2.75	3.05	10

\*Length in cm

## KIT CONTENTS

1 x Catheter	1 x 5ml syringe
1 x 18g x 7cm introducer needle with side valve	1 x Scalpel # 11
1 x 0.035" x 70cm J tip nitinol guidewire	2 x Injection caps
2 x Vessel dilator	1 x Sutureless securement device
1 x Peel away sheath introducer	2 x Wound dressing
1 x tunnelling stylet	1 x Patient identification sticker

## ORDERING INFORMATION

Code	Description	Box Qty
UNIFIX	Unifix Adhesive sutureless securement device for catheter fixation and anchoring	50

Tests done on extracorporeal circuit with fluid having same viscosity (3.5 cP at 37°C) of blood.

## Unifix

Adhesive sutureless securement device

The Kflow Epic Haemo catheter range has been developed for long term haemodialysis access. The biocompatible carbothane lumen construction is key to providing excellent tensile strength, flexibility and superior kink resistance. Available in straight and pre curved configurations in a variety of French sizes and lengths to best meet the needs of patients and clinicians.

## FEATURES &amp; BENEFITS

- Available in 12, 14 & 16 fr to enable clinicians to choose the optimum size for the patient.
- Specifically designed tip configuration to reduce recirculation.
- Round catheter permits easy insertion and supports traditional modified Seldinger insertion technique.
- Catheter available as straight or pre curved configuration. A pre curved catheter often used for jugular approach to make catheter more comfortable for the patient.
- Nitinol guidewire as standard provides excellent kink resistance, and comes pre loaded in holder with thumb feeder capability to help clinician insert guidewire smoothly into the vessel.
- Double D lumen configuration designed to provide lumen stability and strength maintaining equal flow rates and pressure.
- Radiopaque carbothane material is solvent resistant withstanding all major iodine and alcohol based cleaning solutions.
- Priming volume printed on catheter extensions to assist clinicians with catheter maintenance.
- Colour coded clamps and luers ensures easy lumen identification.

**A** Robust colour coded luers

**B** Easily identifiable colour coded clamps & printed extensions

**C** Soft hub and rotating wing to maximise patient comfort

**D** Cuff

To promote optimum tissue granulation and catheter securement

Lumen configuration

Flexible kink resistant Nitinol guidewire

**E** Soft stepped catheter tip design aids smooth insertion and reduces recirculation rates
