Adhesive sutureless  
securement device

Our reputation for developing quality catheter technology in the peritoneal dialysis market place has been firmly established for 30 years. Today our peritoneal access programme combines leading edge materials with our mission to provide quality products at competitive prices. Our new and improved range of Kflow Epic PD catheters has been developed based on experience to better address the needs of today's therapies.

**FEATURES & BENEFITS**

- Soft biocompatible polyurethane catheter material provides excellent tensile strength while allowing for thinner lumen wall and larger internal lumen diameter compared to standard silicone catheters to allow rapid dialysate flows without leaks.
- Available in a variety of french sizes to improve flexibility and choice to better suit individual patient requirements.
- Available with either single or double pre attached cuffs allowing options for catheter securement.
- Large side holes strategically positioned around the intraperitoneal section of the catheter provides excellent dialysate flows and lower incidence of omental occlusion.
- Supplied with luer activated safety valve to ensure repeated hygienic exchanges.
- Self explanatory code numbers.
