Rev No.2

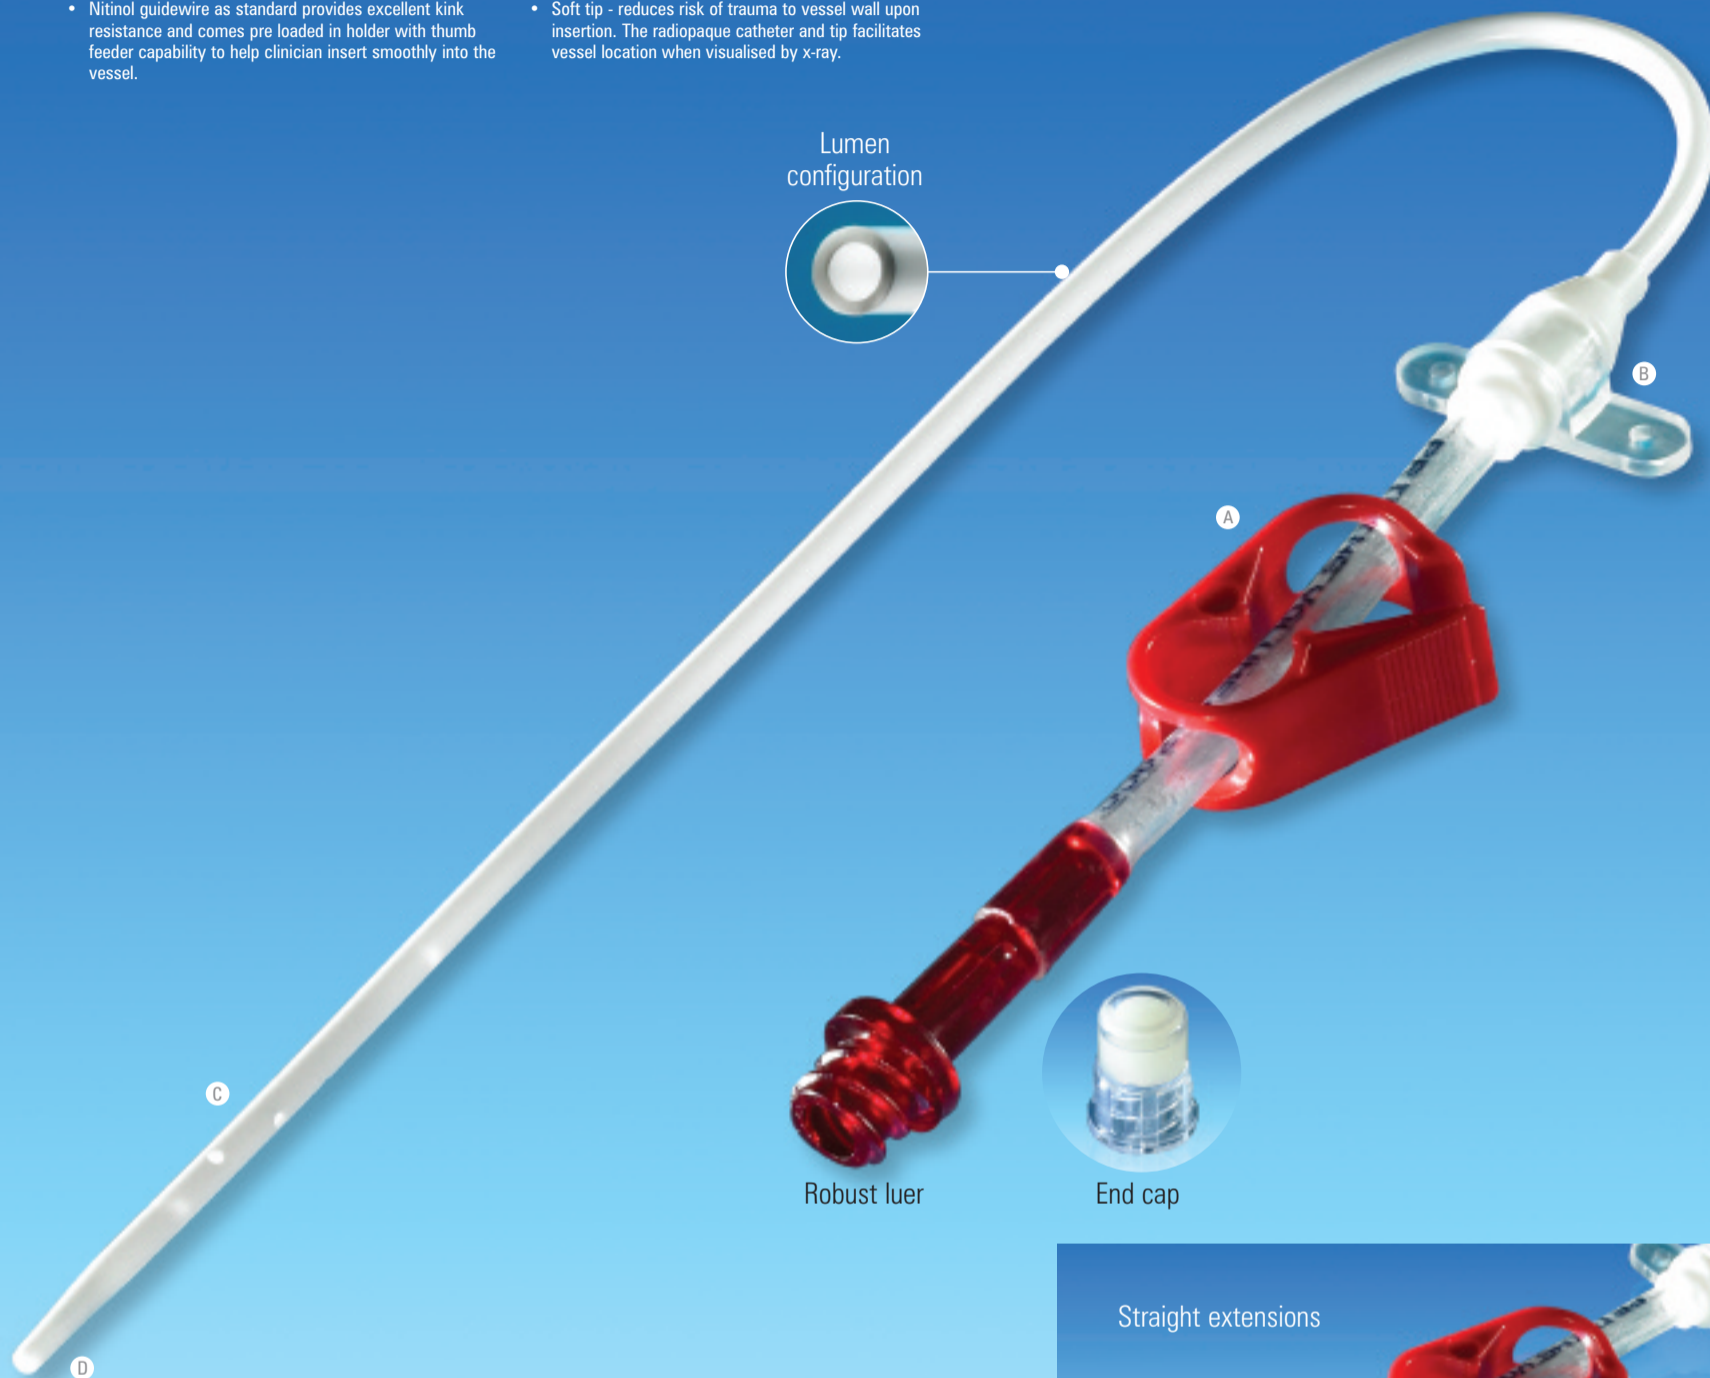

L-132A-0002-A1

The Kflow Epic temporary catheter range is designed for short term therapy needs or to bridge the gap in access while patients are waiting on maturation of permanent access with an AV fistula or graft, or while waiting on revisions of malfunctioning access.

FEATURES & BENEFITS

- Biocompatible polyurethane - haemocompatible and resistant to breakdown caused by site care ointments and solutions (tested for toxicity).
- Soft hub - allows for added patient comfort.
- Nitinol guidewire as standard provides excellent kink resistance and comes pre loaded in holder with thumb feeder capability to help clinician insert smoothly into the vessel.
- Catheter configurations available with straight or pre curved extensions. A pre curved catheter often used for jugular approach to make catheter more comfortable for the patient.
- Soft tip - reduces risk of trauma to vessel wall upon insertion. The radiopaque catheter and tip facilitates vessel location when visualised by x-ray.
