

THE MICROTOL+ ALL PURPOSE CLEANER

This all-purpose cleaning solution can be used as a surface disinfectant where there is a possibility of the transmission of infectious diseases, or to decontaminate spillages of organic matter. It is safe to use on any washable surface, and is both user and environmentally friendly. This pleasantly-scented liquid is active against:

- Pathogenic organisms
- Anti-biotic resistant bacteria
- Odour causing bacteria
- Both enveloped and non-enveloped viruses

MICROTOL+ MIST SPRAY

This product is a pleasantly scented room spray, which contains Microtol. This spray application allows the droplets to slowly fall to the ground, killing microbes which it may come into contact with.

MICROTOL+ AEROSOL

This revolutionary new product is ideal for any ward, I.C.U., or room where the risk of airborne micro-organisms is prevalent. The pleasant scent also makes it perfect for application where a sepsis or cancer case occurs.

Microtol has a vast kill spectrum which incorporates the latest in nano-technology to enhance this killing ability making it a must for any professional in the medical field. The fact that it is remarkably gentle on the skin, along with its biodegradability makes it the most attractive disinfectant available.

MEDICAL CLEANING AND DISINFECTING

Contains

Microtol is a revolutionary new disinfectant which uses the latest in nano-technology to enhance its kill spectrum. The active ingredient is manufactured in an ISO accredited facility. This facility also carries the CE mark and medical device stamps.

MICROTOL IS:

- Biodegradable
- pH neutral
- Non-corrosive
- Highly effective
- Soft on the hands
- Non-toxic

MICROTOL+ HAND RUB

This is a lightly-scented liquid with bactericidal, fungicidal, and virucidal properties. Microtol+ hand rub dries within 30 seconds of being applied. It should be used when the risk of disease transmission is present, or simply when hands need to be sanitized.

MICROTOL+ HAND SOAP

Medical professionals are required to wash their hands countless times within a single shift. This extremely effective anti-microbial hand cleanser has been carefully formulated to include skin softeners and emollients, to make regular hand washing a more pleasant experience.

MICROTOL+ BARRIER CREAM

This product is essential for those who are required to wash their hands several times a day. The cream's protective barrier chemicals prevent excessive water penetration, acid and alkali attacks on the skin. Whilst moisturizing the hands, it also provides effective anti-microbial protection in between washing.

MICROTOL+ HANDI WIPES

Simple and effective, these wet wipes are a pocket-size convenient hygiene accessory which can be used on computer keyboards, door knobs or for hand disinfection.

Limiting the vectoring of communicable diseases, plus the containment of resistant strains, is one of the largest challenges facing healthcare establishments across the globe. Bawoma chemicals understands the crucial role of basic hand hygiene in this regard. The Microtol+ range of products meets this important need. Shouldn't it be your essential first line defense in maintaining a germ-free environment?

HAND HYGIENE

Contains

A powerful broad spectrum disinfectant and sanitizer.
Kills surface and airborne micro-organisms.
